Summary

Senior technical consultant and tech lead with 8 years in full-stack development, backend development, software architecture, and data engineering. Tech lead at ITSS Global since March 2026 on 4 concurrent deliveries: lakehouse data architecture, BPM document workflows, report UI, and complex data

Professional Experience

Senior Technical Consultant | Tech Lead

ITSS Global

March 2026 – Present

- Unblocked central-bank regulatory production and electronic document management for Banque Nationale de l'Habitat (BNH, Algeria) across 6 domains using Java 21, Spring Boot, and Oracle PL/SQL by leading requirements framing, T24-to-lakehouse system architecture (Bronze / Silver / Gold), report UI delivery, data dictionaries, and Business Process Management (BPM) scan / approve workflows.
- Stood up trade-dossier approval circuits for a document-management pilot by running BPM workshops so branches can route dossiers without ad-hoc email.

integrations. Core stack: Java 21, Spring Boot, Oracle SQL / PL/SQL, PostgreSQL, Temenos T24, Temenos Transact, Temenos Transact R25, React.

Skills

Programming:

Python, JavaScript, TypeScript, PL/SQL, Java 21, Java, PHP, VBA

- Closed Nostro (correspondent-account) reconciliation for BNH treasury by delivering a React / Spring Boot / PostgreSQL matching platform with enterprise integration to T24; project completed.
- Launched customer document printing for a CEMAC commercial bank (Congo-Brazzaville) by delivering 11 JRXML templates and Temenos Document Output configuration.
- Brought regulatory compliance reporting live on Temenos Transact R25 for the same CEMAC client by configuring T24 Enquiries for FX, cash position, and central-bank operations.

Java and Oracle PL/SQL Developer

BFI Groupe

July 2023 – March 2026

- Delivered BIAT accounting centralization in Java and Oracle PL/SQL by enterprise integration of core-banking and satellite flows through an Oracle PL/SQL and Java centralizer, with integrity and traceability controls plus latency and volume tuning.
- Built a dual-country regulatory filing subsystem for the same banking group in Morocco and Algeria using Java and Oracle PL/SQL, generating XBRL and XML taxonomies for Bank Al-Maghrib and Banque d'Algérie (COREP-style prudential reporting and FINREP-style financial reporting) with parameterized APIs for enterprise integration with those gateways.

Web Development:

React, FastAPI, Express (Node.js), Spring Boot, Microservices, Ant Design, HTML, Bootstrap, Material UI

State Management:

Redux Toolkit

Databases:

PostgreSQL, MongoDB, MySQL, Oracle SQL, JPA/Hibernate, Mongoose, Redis, IndexedDB, LocalStorage

Enterprise delivery:

Temenos T24, Core Banking Systems, Temenos Transact, Temenos Transact R25, T24 Enquiries, enterprise architecture, software architecture, system architecture, data engineering, full-stack development, backend development, enterprise integration, regulatory reporting, regulatory compliance, prudential reporting, ETL lakehouse (Bronze / Silver / Gold), data dictionaries and lineage, Electronic Document Management (ECM / GED), Business Process Management (BPM) workflows, Jasper / JRXML, Nostro reconciliation

Machine Learning & AI:

- Delivered prudential reporting for UEMOA banks by implementing collection, normalization, controls, statement generation, and transmission against BCEAO requirements.
- Hardened Oracle for high-volume banking transactions by tuning packages, jobs, materialized views, partitioning, indexing, and execution plans, and documenting APIs and architecture.

Development Engineer

SEGULA Technologies for Stellantis Group

October 2018 – June 2023

- Led the analysis and detailed specification of client requirements to ensure the delivery of high-impact solutions.
- Architected and developed Excel VBA software for objective torque-converter calibration on Stellantis automatic transmissions over a 5-year engagement, grounded in vehicle-dynamics models.
- Designed and implemented a comprehensive benchmarking tool that automatically generates detailed .doc reports based on complex client-defined criteria.
- Engineered a robust Excel/Access platform for data navigation, visualization, and updating, with external XML import/export and seamless synchronization with an Access database via optimized SQL queries; later migrated to PostgreSQL while ensuring backward compatibility with existing tools.

PyTorch, TensorFlow, scikit-learn, Hugging Face Transformers, Vision Transformers (ViT), EfficientNet, ConvNext, TIMM, LoRA, GPU inference, LLMs, MediaPipe, OpenCV, TensorBoard

3D Graphics & CAD:

Three.js, React Three Fiber, OpenCASCADE.js, WebAssembly (WASM), Parametric Modeling, CAD File Formats (STEP, IGES, STL, OBJ)

Methodologies:

Agile Scrum

CI/CD & Tools:

Git, Docker, Docker Compose, GitLab CI/CD, Nginx, OVHcloud, Vite, WebSocket, WebRTC, JWT Authentication

Languages

Arabic: Native

French: Fluent

English: Fluent

Education

National Engineering Degree

École Nationale Supérieure d'Ingénieurs de Tunis (ENSIT),

Featured Projects

Independent digital health platform

- Independent startup product (not an employer), 2024 to present: production multi-tenant health platform with React, FastAPI, PostgreSQL, Stripe marketplace, and clinical questionnaire trees.
- Dermatology GPU inference (PyTorch, Hugging Face Transformers, LoRA), GitLab CI/CD on OVHcloud Docker Compose, self-hosted Jitsi and LiveKit.

CADSHIP

- Developed a full-stack web platform for managing and visualizing CAD files (STL, OBJ).
- Node.js/Express backend for file processing and a React frontend for an interactive user interface.

Centralized AI Model Framework

- Architecture: React (UI), FastAPI/Spring Boot API, model registry with a unified inference interface (adapters), PostgreSQL, Docker.
- Features: seamless model swapping, interchangeability in workflows/pipelines without modifying consumer code, versioning and rollback, A/B testing, and change auditing.

Certifications

Tunis, Tunisia

Graduated June 2018
(September 2015 to June
2018)

Preparatory Classes for Engineering Studies (MP track)

Institut préparatoire aux
études d'ingénieurs d'El Manar
(IPEIEM), Tunis
2013 - 2015

Tunisian Baccalaureate, Mathematics specialty

Graduated 2013

Accelerated VBA Training - Stellantis

Technical Center, Carrières-sous-Poissy

August 2019

- Intensive practical training on advanced VBA development in industrial applications.

Massinissa Framework Training - BFI

Proprietary Java MVC Framework

4 months

- 4-month program on the architecture of the Massinissa framework, based on Java and the MVC architecture.
