## PROFESSIONAL SUMMARY

---

Senior backend and data engineer with 8 years designing high-volume data systems on Oracle SQL / PL/SQL, PostgreSQL, Java / Spring Boot, and ETL lakehouse patterns (Bronze / Silver / Gold). Tech lead since March 2026 on regulatory data pipelines, data dictionaries, lineage, and reconciliation services for banking clients. Strong focus on performance tuning, data quality, integrity controls, and reliable batch / transactional processing.

## SKILLS

---

**Languages:** Java 21, Java, Python, PL/SQL, SQL, JavaScript, TypeScript

**Backend:** Spring Boot, FastAPI, RESTful APIs, JWT, batch jobs, packages, microservices, SQLAlchemy, Alembic

**Databases:** Oracle SQL, PostgreSQL, MySQL, SQL Server, MongoDB, Redis, JPA/Hibernate, indexing, partitioning, materialized views, execution-plan tuning

**ETL and data:** Bronze / Silver / Gold lakehouse, system architecture, data dictionaries, data lineage, SRC\_\* / REF\_\* / FACT\_\* modeling, report delivery pipelines, pandas, GeoJSON

**APIs and integration:** Core-banking extraction, enterprise integration, system-to-system orchestration, XML import / export

**Tools:** Git, Docker, Docker Compose, GitLab CI/CD, Nginx, OVHcloud, Agile Scrum

**Domain:** Regulatory reporting, regulatory compliance, prudential reporting, Nostro reconciliation, Temenos T24 / Transact (data interfaces)

**Languages (spoken):** Arabic (native), French (fluent), English (fluent)

## PROFESSIONAL EXPERIENCE

---

### Senior Technical Consultant / Tech Lead

ITSS Global | Client missions: Algeria and Congo-Brazzaville | March 2026 - Present

- Stood up regulatory data pipelines across 6 bank domains for Banque Nationale de l'Habitat (BNH, Algeria) with end-to-end lineage by extracting Temenos T24 into a Bronze / Silver / Gold lakehouse system architecture and publishing curated SRC\_\* / REF\_\* / FACT\_\* models with domain dictionaries.
- Put central-bank declaration packs into bank users' hands by building SQL pipelines from report templates down to Bronze, plus parameterization and a validation UI for métier review.

- Closed a Nostro (correspondent-account) reconciliation service for BNH by delivering Spring Boot / Java 21 / PostgreSQL / React services with enterprise integration to T24, including automated and manual matching.
- Reached regulatory compliance reporting go-live for a CEMAC commercial bank (Congo-Brazzaville) by configuring T24 enquiries and Document Output data feeds on Temenos Transact R25.

### **Java and Oracle PL/SQL Developer**

BFI Groupe | Tunisia | July 2023 - March 2026

- Stabilized BIAT accounting-flow integration by synchronizing core-banking and satellite systems with integrity / traceability controls and performance tuning for volume and latency.
- Built a dual-country regulatory filing subsystem for the same banking group in Morocco and Algeria using Java and Oracle PL/SQL, generating XBRL and XML taxonomies for Bank Al-Maghrib and Banque d'Algérie (COREP-style prudential reporting and FINREP-style financial reporting) with parameterized APIs for enterprise integration with those gateways.
- Enabled UEMOA prudential statement production by implementing collection, normalization, controls, and generation against regional regulatory requirements.
- Raised Oracle throughput for critical transactions by implementing packages, jobs, materialized views, partitioning, indexing, and execution-plan tuning.

### **Software Development Engineer**

SEGULA Technologies for Groupe Stellantis | France | October 2018 - June 2023

- Centralized engineering dataset access for Stellantis teams over a 5-year engagement by building Excel / Access tooling with XML and optimized SQL, then migrating storage to PostgreSQL with backward compatibility.
- Cut manual report assembly time for engineering reviews by automating .doc generation from client-defined criteria over large calibration datasets.

## **EDUCATION**

---

**National Engineering Degree** - École Nationale Supérieure d'Ingénieurs de Tunis (ENSIT), Tunis, Tunisia - Graduated June 2018 (September 2015 to June 2018)

**Preparatory Classes for Engineering Studies (MP track)** - Institut préparatoire aux études d'ingénieurs d'El Manar (IPEIEM), Tunis, Tunisia - 2013 to 2015

**Tunisian Baccalaureate, Mathematics specialty** - Graduated 2013

## **PROJECTS**

---

### **Independent digital health platform**

Independent startup product (not an employer) | 2024 to present | FastAPI, PostgreSQL, Docker Compose, GitLab CI/CD, Nginx, OVHcloud, pandas, GeoJSON

- Migrated production to OVHcloud: multi-VPS Docker Compose, managed PostgreSQL, Nginx reverse proxy, Let's Encrypt, and GitLab CI/CD with SSH deploy hooks.
- Delivered a geospatial healthcare POI atlas: FastAPI, pandas, GeoJSON, choropleth need scores, and regional ranking.

- Ran GPU inference in production behind Nginx (Hugging Face Transformers, PyTorch, 4-bit NF4) with JWT auth, rate limiting, and Alembic migrations.

### **VisionForge AI**

Spring Boot, FastAPI, PostgreSQL, PyTorch, Docker | <https://github.com/dhiaBenHmida/VisionForge-AI>

- Model registry and unified inference interface with versioning, rollback, and A/B testing across hybrid microservices.

### **DermaDetectAI**

FastAPI, PostgreSQL, PyTorch, React | <https://github.com/dhiaBenHmida/DermaDetectAI>

- Backend APIs and PostgreSQL persistence for GPU-accelerated inference, session history, and role-based access.

## **CERTIFICATIONS**

---

### **Massinissa Framework Training - BFI**

Four-month Java / MVC framework program

### **Accelerated VBA Training - Stellantis**

Technical Center, Carrières-sous-Poissy | August 2019
