Portfolio: <https://mdbh.netlify.app>

PROFESSIONAL SUMMARY

Senior technical consultant and tech lead with 8 years building mission-critical systems for banks. At ITSS Global since March 2026, I lead regulatory reporting and electronic document management deliveries across North and Central Africa: requirements framing, Bronze / Silver / Gold lakehouse architecture, BPM document workflows, and Nostro reconciliation. Core stack: Java 21, Spring Boot, Oracle SQL and PL/SQL, PostgreSQL, Temenos T24 / Transact, React.

SKILLS

Banking and regulatory: Temenos T24, Core Banking Systems, Temenos Transact, Temenos Transact R25, T24 enquiries, enterprise architecture, software architecture, system architecture, data engineering, full-stack development, backend development, enterprise integration, regulatory reporting, regulatory compliance, prudential reporting, COREP-style prudential reporting, FINREP-style financial reporting, ETL and data lakehouse (Bronze / Silver / Gold), data dictionaries and lineage, Electronic Document Management (ECM / GED), Business Process Management (BPM) workflow design, Jasper / JRXML document production, Nostro reconciliation

Programming: Java 21, Java, Python, JavaScript, TypeScript, PL/SQL, SQL

Backend and web: Spring Boot, FastAPI, React, Ant Design, RESTful APIs, JWT, microservices

Databases: Oracle SQL, PostgreSQL, MySQL, SQL Server, Redis, JPA/Hibernate, execution-plan tuning

Tools: Git, Docker, GitLab CI/CD, Agile Scrum, Vite

Proficiency: Software engineering (8 years, 2018 to present); Java, Spring Boot, and Oracle PL/SQL (production since 2023); Temenos T24 and Core Banking Systems (since 2026); PostgreSQL (since 2018)

Languages: Arabic (native), French (fluent), English (fluent)

PROFESSIONAL EXPERIENCE

Senior Technical Consultant / Tech Lead

ITSS Global | Client missions: Algeria and Congo-Brazzaville | March 2026 - Present

Tech lead on 4 concurrent deliveries: BNH regulatory reporting and GED, Nostro reconciliation (completed), CEMAC document production, and CEMAC T24 regulatory reporting.

- Unblocked central-bank regulatory production and electronic document management for Banque Nationale de l'Habitat (BNH, Algeria) across 6 domains using Java 21, Spring Boot, and Oracle PL/SQL by leading requirements framing, T24-to-lakehouse system architecture (Bronze / Silver / Gold), report UI delivery, data dictionaries, and Business Process Management (BPM) scan / index / approve flows.

- Stood up trade-dossier approval circuits for a document-management pilot by running BPM workshops (process matrices, flux catalogue, prerequisite tracking) so branches can route dossiers without ad-hoc email.
- Closed Nostro (correspondent-account) reconciliation for BNH treasury by delivering a React / Spring Boot / PostgreSQL matching platform with enterprise integration to T24; project completed and not ongoing.
- Launched customer document printing for a CEMAC commercial bank (Congo-Brazzaville) by delivering 11 JRXML templates and Document Output configuration (RIB, statements, cash receipts, and related types).
- Brought regulatory compliance reporting live on Temenos Transact R25 for the same CEMAC client by configuring T24 Enquiries for FX, cash position, and central-bank operations.

Java and Oracle PL/SQL Developer

BFI Groupe | Tunisia | July 2023 - March 2026

- Delivered BIAT accounting centralization in Java and Oracle PL/SQL by enterprise integration of core-banking and satellite flows with integrity controls and performance tuning.
- Built a dual-country regulatory filing subsystem for BMCI (BNP Paribas Maghreb) and BNP Paribas El Djazaïr using Java and Oracle PL/SQL, generating XBRL and XML taxonomies for Bank Al-Maghrib and Banque d'Algérie (COREP-style prudential reporting and FINREP-style financial reporting) with parameterized APIs for enterprise integration with those gateways.
- Enabled UEMOA prudential reporting by implementing collection, normalization, controls, and statement transmission against regional requirements.
- Hardened Oracle for critical bank transactions by tuning packages, jobs, materialized views, partitioning, indexing, and execution plans.

Software Development Engineer

SEGULA Technologies for Groupe Stellantis | France | October 2018 - June 2023

- Delivered calibration and benchmarking software in Excel VBA for Stellantis automatic-transmission programs over a 5-year engagement by leading requirements analysis and building internal tooling with automated .doc reports.
- Migrated an engineering data platform to PostgreSQL without breaking existing Excel / Access clients by redesigning XML import / export and SQL synchronization.

EDUCATION

National Engineering Degree - École Nationale Supérieure d'Ingénieurs de Tunis (ENSIT), Tunis, Tunisia - Graduated June 2018 (September 2015 to June 2018)

Preparatory Classes for Engineering Studies (MP track) - Institut préparatoire aux études d'ingénieurs d'El Manar (IPEIEM), Tunis, Tunisia - 2013 to 2015

Tunisian Baccalaureate, Mathematics specialty - Graduated 2013

CERTIFICATIONS

Massinissa Framework Training - BFI

Four-month program on Massinissa framework architecture (Java, MVC)

Accelerated VBA Training - Stellantis

Technical Center, Carrières-sous-Poissy | August 2019
